BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) [Béthune-Houriez?]

Title De la culture d'une nouvelle espèce de blé de Mars, connue sous le nom de blé d'Espagne.

Abbreviated reference Mém. Soc. Émul. Cambrai 17 (1): [179]-183. 1841.

MLP 3441

Notes *Séance publique of 17 Aug 1839*
[Report for the Committee on Agriculture]

Author could have been either Béthune-Houriez or Tordeux, since both were members of the Committee on Agriculture.

The wheat was introduced into France from Spain by a French officer after the campaign of 1823. M. Casteleyn, a farmer at Boistrancourt was the first to introduce it into ^{the} Cambrai district and he had been cultivating it for 2 years. P. 180 gives the earliest and latest times of planting. Rest cultural.

Included because it was a new variety introduced.
