

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) ~~[Editor?]~~

Alexander, R. (Ed.) (?)

Title The climate and soil of Tirhoot.

Abbreviated reference Alexander's East India Colon. Mag. 18 (108): 410-412. 1839 [Nov].
MLP 3018

Notes $\bar{x}$ As well as climate and soil there is also information about two particular species of plants peculiar to Tirhoot and not to be encountered elsewhere in Hindoostan.

- 1). Jathamunsee, known in Europe by the name of Spikenard - which grew at the extreme north of the district
- 2). Bilva or malura, which grew on the banks of the Dhaimra lake; called also by the Indians Sreephala.

Sugar was increasingly being cultivated. Several farmers has increased their acreage during the past 4-5 years.
