Author(s) CANDOLLE [Augustin Pyrame].

Candolle, Augustin Pyramus de

Title Sur l'arracacha et quelques autres racines légumineuses de la famille des ombellifères.

Abbreviated reference Arch. Découv. Invent. Nouv. [22] ... pendant l'année 1829: 52-54. 1830.

Arch. Découv. Invent. Nouv. 1829: 52-54. 1830

MLP 226 A

Notes (X) Description of the arracacha plant and the terrain it thrives on. Candolle recognised two species: arracacha esculenta and arracacha moschata, both grow better in temperate regions than in hot. The second plant described was secacoul - plabed by Candolle in the genus panais - no difficulty in introducing this plant into Europe.
