BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

B

Author(s) BANKS, (Sir) Joseph

Title Notice from a work of Monsieur Lelieur, on the hereditary diseases of fruit trees.

MLP 1370

Abbreviated reference Trans. Hort. Soc. London ed. 2, 1: Append. 27. 1815.

Notes Read Jan. 6, 1812.

Summary in English, of the account from Le Moniteur, of 7 Dec. 1811. Banks says that the work on the diseases of fruits trees had recently been published by Lelieur, but had not at that time been imported into England.

The only work of Lelieur's published at this time that I have found is De la culture du Rosier, avec quelques vues sur d'autres arbres et arbustes.

La pomone française, which contains a considerable section on the diseases briefly described in Banks article, was not apparently published until 1816.
