BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) [BAUER, Francis].

Title The grain worms.

MP 2/27

Abbreviated reference Penny Mag. (London) 2 (86): 300-302. ~~1-10. 1833~~ 1-10. 1833 [3 Aug.]

Notes Ed. says that they had received an interesting paper on grain worms, from the correspondent who had given the former papers on smut balls, i.e. F. Bauer. As this paper was too long for inclusion at one go, he was publishing the tables of figures with explanations in this part and in the following part would publish the remainder of the article. The figures show the grains in various stages with and without worms.
