

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) [CHRISTY] [?] *Christy, William*

Title [Plantes rares de Jersey].

Abbreviated reference *MLP 2737A* *8 Hermes* ~~Echo Monde Savant (209): 2e division — sciences — naturelles et géographiques (59): 25. [1837, 18 Feb.].~~
[3] (209): *2e* Div. *2e* Sci. Nat. (59) 25. 1837 [18 Feb.].

Notes *(X)* Christy had published a list of new plants he had found in Jersey in October, 1836, in Loudon's Magazine. Plants growing also in France are listed here:

In the south: Mathiola sinuata, Sennebiera didyma, Echium violaceum, Scrophularia scorodonia.

Plants found on coasts around Cherbourg: Cotyledon umbilicus, convolvulus soldanella (Calystegia), Juncus acutus, Crithmum maritimum, Erodium maritimum,

Central and Eastern France: Helianthemum guttatum, Glaucium flavum, Sibthorpia europaea, Polycarpon tetraphyllum, Lotus angustissimus, Erodium moschatum,
Carlina acaulis.
