Title *Florum Arnicae (montanae] vires. Pars quarta.*

MP 2945
Abbreviated reference Med. Philos. Comment. Soc. Edinburgh 5(3): 233-245. 1778.

Intended as a "review" of a recently published dissertation from Vienna, the Notes paper cites verbatim the Latin description of *Arnica monatana* on pp. 234-236. The remainder of the paper consists of case histories, reporting the use of the remedy against various paralytic syndromes, against amaurosis and as an antispasmodic.
