B

Author(s) CUVIER, [Georges]. *Cuvier, Georges Léopold Chrétien Frédéric Dagobert (Baron)*

Title Analyse des travaux...pendant l'année 1807: botanique.

Abbreviated reference Analyse Trav. Cl. Sci. Math. Inst., Pt. Phys.

1807: 17-20.

[< Jan. 1808 >]

MLP 1885 A

Notes

(X)

Resume of the work by:

Jussieu - had continued work of analysis on certain families. Communicated to the Académie 2 new genera, dicliptera and blechum, which he had separated from justicia. Happel-la-Chesnaye in Guadeloupe had communicated an interesting observation on the trachea of the banana.

Dupetit-Thouars - concentrated on his theory that the stalks of trees had the principle of growth in their buds and that the fibres which composed their layers of growth, were in some ways, the roots of those buds.
