

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) ~~DELILE [Alire Raffeneau]~~

Cuvier, Georges Léopold Chrétien Frédéric Dagobert (Baron)

Title Sur le Perséa de l'Égypte.

Abbreviated reference Arch. Découv. Invent. Nouv. ~~[2] pendant l'année 1819: 30-31. 1820.~~

Arch. Découv. Invent. Nouv. 1819: 30-31. 1820

MLP 226A

Notes ^(X) The perseæ, known to the ancients, had become very rare. A tree which had many of its characteristics, Ximenia aegyptiaca was seen by Delile in a garden in Cairo. Notes on its botanical characteristics. Other trees seen in Upper Egypt had differences enough to separate them from Ximenia and Delile created another genus Balanites.
