Author(s) CUVIER, [Georges]. *Cuvier, Georges Léopold Christien Frédéric*  
*Dagobert (Baron)*

Title Analyse des travaux...pendant l'année 1826: botanique.

## Abbreviated reference

*Trav.*  
 Analyse Acad. Roy. Sci., Pt. Phys. 1826: 30-35. <11 June 1827>  
 MLP 1889 A

## Notes

① Résumé of work done by:

Brown, Candolle and later Brongniart on the Bruniaceae.

Duvau had presented a memoir on the veronicas in which he reviewed in detail all the modifications of their calyx, corolla, stamens, ovary and stigmata, fruit and seeds.

DeLille: stated his disagreement with other scientists that the marine substance called by Lamouroux acetabularia integra was a polyp. A chemical analysis by Balard confirmed his claim that the weed should be classified with the conferva.
