

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

B

Author(s) CUVIER, [Georges]. *Cuvier, Georges Léopold Chrétien*
Frédéric Dagobert (Baron)

Title Analyse des travaux...pendant l'année 1828: physiologie végétale et botanique.

Abbreviated reference

Trav.
 Analyse Acad. Roy. Sci., Pt. Phys. 1828: 31-52. [1829?] *21*
 MLP 1889 A

Notes (X) Résumé of work done by:

Dutrochet's work on endosmosis, which gained the prize for physiology founded by M. Monthyon.

Mirbel, on the development of the plant ovule: and on the bundles of vessels in a specimen of calycanthus floridus.

Dupetit-Thouars- work on the disposition of the stamens of the wild poppy.

Brongniart on the nature of pollen- opposed by Raspail and Brown, he defended his opinions in a 2nd memoir.

Moreau de Jonnès communicated to the Académie his research on maize, the spread of its ~~cultu~~ culture and its antiquity among the natives of the New World.

Delile described Theligionum cynocrambe after observations of it around Montpellier; description here.
