B

Title ^{Observation} Observation sur la possibilité de remplacer le Thé de la Chine, du Mexique et autres, par des plantes indigènes ou de notre climat.

MLP 3306
Abbreviated reference J. Soc. Pharm. (Paris) 1.II(9): 328-329. 1799/1800 ³ [Feb.].
1799

Notes ^① "Paper read at an open session of the Lycée des Arts, by Citizen Delunel, pharmacist and member of several learned societies." ^② Treats at some length the experimental work of Leméry, who received, in 1702, two species of plants cultivated in the island of Martinique and brought by the Jesuit apothecary Yon. The species are said to have been "cariophyllata" or "cuambu", and "capraria". The date of the original issue: 15 pluviôse, an VII. Cuambu
