B

Title Rapport fait à l'Académie des Sciences, sur le voyage de M. Augustin de Saint-Hilaire dans le Brésil et les missions de Paraguay

MLP 3310 A
Abbreviated reference J. Voyages Découv. 17(53): 360-368. 1823 [March]

Notes [See C form from same citation: Haint-Hilaire, Augustin]

(X) Saint-Hilaire's discoveries: Province of Minas, Brazil - a species of cinchona different from that seen in Peru. Vegetation in Minas Geraes comprised mainly Araucaria. Recognized "grass of Paraguay" to be of the illex family: according to Willis [¶]Ilex paraguensis A. St. Hilaire.

Observed, in Rio Grande, Brasil, the limits of cultivation of sugar-cane was 30°, cotton tree 31°, palm tree 34°

{See C form Saint-Hilaire, Augustin, citation as above}
