

## BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) <sup>P</sup> DICKSON, Thomas<sub>x</sub>

Title Observations on the disease in the potatoe, generally called the curl; pointing out the most probable method of preventing it; with an account of the results of a few experiments made on the subject.

Abbreviated reference <sup>MLP 2923</sup> Rept. Arts, Manufactures Agric. Ser. 2, 26 (152): 107-114. 1815 [Jan.]

Notes (X) Puts forward various theories as to the cause of the curl.
