^p Dupetit-Thouars, Louis Marie Aubert. Aubert

Title Sur la réformation de l'épiderme dans les arbres qui ont été décortiqués.

Abbreviated reference Arch. Découv. Invent. Nouv. ~~Arch. Découv. Invent. Nouv.~~ pendant l'année 1811: 29-30. 1812^x
MLP 226 A

Notes Formation of bark on trees which have been peeled.
Two ways: 1) by a callus forming over the wound and gradually covering the peeled area from outer edge to the centre.
2) Whole bark is renewed in one piece, the wood under the former bark forms the new bark.

Extract from Bulletin philomatique, sept., 1811 [Sept.]

Nouv. Bull. Sci. Soc. Philom. Paris 2(48): 333-337. 1811 [Sept.]

This is the only part of the title of this journal given.
