Notes While the work ~~with~~ this title was published some years earlier (1811), this appears to be an abridgement, possibly by the author himself, who at the time was living in Montpellier, in the terminal stages of his illness, dying in September 1818. Note that in the Register for the volume this and the next paper (Mémoire sur l'Aconit des anciens) are credited to "the professors De Candolle and Encontre."
