

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

113506

B

Author(s) FAUJAS-DE-SAINT-FOND, [Barthélemy] I

Title On some circumstances relative to silk worms.

MLP 3914

Abbreviated reference Ann. Agric. Other Useful Arts 16 (90): 19-37. 1791 ~~[June?]~~

Notes Translated into English by a friend of the Editor. Although this is an article primarily on silk worms, the author, to illustrate his point on the importance of renewing the air in their boxes, quotes at length the experiments made by Ingen Housz on the corrupting influence on the air of plants in the dark. PP. 27-32 are those quoted from Ingen Houss.
