Author(s) [FERRY]. [Claude-Joseph].

Ferry, Claude-Joseph

Title Analyse des travaux de l'Académie<sup>royale</sup> des Sciences pendant l'année 1827 (1).

Abbreviated reference ~~Rev. Encycl. [2e série] 39 (115): 45-70. Juillet 1828. [July].~~

Rev. Encycl. 39(115): 45-70. July 1828 [July]

MLP 1257A

Notes Abstract by Ferry, signed at the end of the article.  
Published Paris, Firmin Didot, 1828. 2 brochures, 4to. 80, 88p.  
Abstract of works in both the mathematical and physical sciences parts, includes abstracts by Mirbel on geographical ~~distribution~~ of phanerogamic plants of the old world; by Dupetit-Thouars on the distribution of conifers; by Turpin on the growth of the truffle.  
Also a paragraph on botanical works in progress and completed, particularly the Flore brésilienne, by Saint-Hilaire, Jussieu and Cambessedé.  
Plants collected on the expedition of Freycinet had been described by Gaudichaud; Delisle had published his work on isôetes.  
Botanical section contained within pp. 59-62.
