

Author(s) FERRY, *Claude-Joseph*

Title Analyse des travaux de l'Académie royales des Sciences pendant l'année 1828 (1).

Abbreviated reference ~~Rev. Encycl. [3^{me} série] 43 ([127]): 42-72. Juillet-Septembre 1829. [July]~~
Rev. Encycl. 43([127]): 42-72. July/Sept. 1829 [July]

MLP 1257A

Notes An abstract by Ferry of the two sections of the Analyse de l'Académie, [parties mathématiques et physiques].

(1) refers to a footnote with the following information: Published Paris, Firmin & Didot, 2 cahiers, 4to, 59 & 113p. Although the abstract does not say that they are parties mathématiques et physiques, I have checked the BM holdings of this title and the pagination corresponds exactly.

Included are abstracts of botanical articles by Dutrochet on endosmosis, Mirbel on the ovule, Dupetit-Thouars on the disposition of stamens and a debate on plant reproduction by MM. Adolphe Brongniart, Raspail, and Robert Brown.
