BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) FIGUIER, [Pierre].

Title Examen chimique des pois-chiches.

MLP 36/17

Abbreviated reference Recueil Bull. Soc. Libre Sci. Montpellier 4 (47): 173-184. 1811.

Notes Principally on the chemical analysis of Cicer Arietinum, but p. 173 describes a peculiarity of the pea when fully grown; i.e. its stem, leaves and seed envelope were covered with hairs which exuded a colourless, odourless liquid, which Proust recognised as an acid and which Deyeux, in a memoir to the Institut recognised as oxalic acid, proposing to call it acide cicérique.
