Notes

Extract (translated by the editor: algeater Romney)
 from Diccionario de Paul. Física 1:54, from the
 article on Air. Emphasis is on the importance of
 not destroying trees. The Diccionario has not been
 located, but in Experiments and observations on different
 kinds of air, by Priestley, ed. 3. p 94-95, 1791, there is a letter
 from Franklin which expresses almost exactly the
 same thought. Perhaps this was picked up by the author
 of the Diccionario.
