Notes

Extract (translated by José Antonio Alzate y Ramírez? (ed.)
 from Diccionario de Paul. Física 1: 54, from the
 article on Air. Emphasis is on the importance of not
 destroying trees. The Diccionario has not been located, but
 in Experiments and observations on different kinds of air,
 by Priestley, ed. 3, p. 94-95, 1791, there is a letter from
 Franklin which expresses almost exactly the same thoughts.
 Perhaps this was picked up by the author of the Diccionario.
