B

Author(s) ^P [FRASER, John].

Title [Plants described in Flora Caroliniana].

MLP 3914
Abbreviated reference Ann. Agric. Other Useful Arts 11 (61): 85. 1889 ⁷ ~~[Jan?]~~

Notes This is a footnote to Walter's letter, by Fraser. It notes that an illustration of the new grass described by Walter in his letter could be seen in the Flora Caroliniana, p.5 & 73.
Fraser also mentions that he could supply nurserymen with all the plants described in the Flora; also sets of dried plants which he had collected in America "at great peril" in the previous year. Made-up title.
