Author(s) FRASER, John.

Title [Letter which accompanied the plate of Agrostis cornucopiae].

MLP 3914

Abbreviated reference Ann. Agric. Other Useful Arts 13 (76): 315-317. 1790 ~~[Ann.]~~

Notes This letter is dated 13 Oct. 1789, two years earlier than his first letter about the plant. Fraser explains that he had been asked for a drawing of the plant by the editors of several journals, chiefly, he supposed, because of a spurious illus. which had appeared in the Gentleman's magazine. That illus. was of a common English poa. 2nd part of the letter deals with his trials of cultivation. Postscript to the letter contains a passing reference to the fact that Walter was then deceased.

The plate is on paper different from that usually used. Made up file
