Author(s)^P DUTROCHET, ~~[Henri]~~ René Joachim Henri (Marquis de Néons) **B**

Title Sur la chaleur des végétaux.

Abbreviated reference Arch. Découv. Invent. Nouv. ~~[31] ...pendant l'année 1839: 38-40. 1841.~~

Arch. Découv. Invent. Nouv. 1839: 38-40. 1841

MLP 226A

Notes According to the author, plants have heat of their own, which rises to a maximum level at midday and a minimum during the night. To confirm his ideas he experimented with Euphorbia satyris, no other plant having such a high temperature. Discovered that the presence or absence of light plays an important part in the level of temperature of plants.
