Title

Abbeville (Somme).— Phénomène de physiologie végétale.

Abbreviated reference

~~Rev. Encycl. [sér. 3], 43 ([129]): 761-763. Juillet-septembre 1829~~

Rev. Encycl. [sér. 3], 43([129]): 761-763. 1829 [Sept.]

[Sept.]

MLP 1257A

Notes

Phenomenon in an apple tree about 40 years old. Absence of petals and stamens in its flowers. M. Tillette of Clermont wrote about it to the Société linnéenne de Paris and had recently read a paper about it to the Société royale d'Émulation d'Abbeville, and how it was artificially fertilized each year.
