

Author(s) ^f Gasc, J[ean]-Ch[arles]

Title Nouvelles observations sur les effets de la ciguë, Conium maculatum L.

MLP 2725

Abbreviated reference Ann. Soc. Méd.-Prat. Montpellier 7: 193-208. 1806.

Notes The Conium maculatum has fallen into disrepute, since the original ⁹²exaggerated reports of Stoerch, which were not confirmed by subsequent trials. The author wishes to rehabilitate the remedy, especially in the form of an extract, but recommends more judicious use of it. It seems that the paper had previously appeared in J. Gén. Méd. vol. 23, although no hint of the fact is given in the present extract.
