Carlo

Title Limites de la végétation dur l'Etna.

Abbreviated reference Arch. Découv. Invent. Nouv. [24] ~~...pendant les années 1831/et 1832:~~
10-11. 1833.

Arch. Découv. Invent. Nouv. 1831/32: 10-11. 1833

MLP 226A

Notes Height of Etna - 10,484ft. Plants grow better and to a greater height on the eastern and southern facing slopes than on the other two sides.

<u>Plant:</u>	<u>height East & South:</u>	<u>height West & North.</u>
Spelt	1,600 ft	1,000 ft
<u>Cactus opuntia</u>	3,200 "	2,000 "
Vine and fig-tree	4,000 "	3,000 "
Chestnut	5,100 "	less than 3,600 "

Plants which reach greatest heights:

astragalus oetnensis 7,948 ft

anthemis montana 8,600 "

senecio chrisanthemifolius 8,850 " after that vegetation disappears.
