

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

116250

B

Author(s) ^P GODRON, [Dominique Alexandre?]

Title Compte rendu des travaux de la Société royale pendant l'année 1839.

MLP 934
Abbreviated reference Mém. Soc. Roy. Sci. Nancy 1839: [v]-xxviii. 1840. ✓

Notes Botany p. xviii.
Braconnot had published in a long paper new observations on river algae, in which he had discovered signs of animal qualities.
Laurent was continuing his work on the expansion of gases in the juices in plants, and their effect on the development of cells.
~~Nombres Fiermas had described and drawn a new fossil which he had named maclurella trochiformis.~~
