

Author(s) ~~X~~ GOVAN ~~X~~

Title Topographie médicale et végétale de quelques parties de l'Himalaya.

Abbreviated reference ~~Nouv. Ann. Voyages~~ ^{Sci. Géogr.} ~~1828~~ ~~Novembre~~ ~~1828~~ ~~[November]~~ ~~40~~ ~~[(116)]~~ ~~: 248-250.~~Nouv. Ann. Voyages Sci. Géogr. 40 ~~[(116)]~~: 248-250. 1828 [Nov.]

MLP 3531 A

Notes Translated extract from Asiatic journal, août 1828. Natural products included: Pinus longifolia, rhododendron, wild strawberries, cotton tree, sugar cane, ginger, turmeric, wheat, barley, rice. Govan thought that the wheat of "Ladakh" was a new species, also a species of barley called "oua", which he had introduced into Scotland. These are the only names given for these two species.
