Title A paper on the geology of Cutch.

Abbreviated reference Proc. Geol. Soc. London 2 (50): 525-528. 1838 [1837] ✓
MLP 2099

Notes Abstract of a paper read by Charles Lyell at the meeting of 22 Feb. 1837. It includes a description of a marine forest (still growing) in the Gulf of Cutch. Names of trees and shrubs not given. The lower branches were covered with testacea, the upper branches with water fowl. At low water the trees were visible to their roots; at high water only their tops were visible.
