

Author(s) GROGNIER, L [ouis] F [urcy] .

Title Les Travaux de M. Rast-Maupas.

MLP 2662

Abbreviated reference Compt. Rend. Trav. Soc. Roy. Agric. Lyon 1819/1820: 189-192. 1820.

Notes Included in the section "Designation des agriculteurs les plus recommandables de l'arrondissement de Lyon". R.M. was included because, convinced of the importance of the introduction of useful and decorative plants, he had established a rich garden of naturalized plants at Éculy. (There seems to be a variation in the spelling of this place; Écully in an earlier work).
The following had flowered for the first time in the province under him:
Broussonnetia papirifera; Aylanthus glandulosa; Gymnocladus canadensis;
Myrica cerifera; Phormium tenax; Ginkgo biloba (spelt here Gincgko)
Juglans olivae formis; Morus rubra foeminea.
