B

Author(s) [HALDAT, Alexandre, Secretary].

P Haldat du Lys, Charles Nicolas Alexandre (Secr.)

Title Annonce des nouvelles découvertes en physique, en géographie et en histoire naturelle, faites en Amérique.

MLP 3585

Abbreviated reference Précis Analytique Trav. Soc. Sci. Nancy 1806: 22-25. ^{Aug.} 1806 ~~1806~~

Notes Botany pp. 23-24. Valentin, one of the members had identified a "new" tree, discovered by Levis and Clark as they had explored the River Missouri. A species of poplar, it was described in Marshall's *Arbutum americanum* and called Populus deltoides. Valentin said that it was almost unknown to botanists. Mentions that it grew rapidly and the female flowers produced a large quantity of a cotton substance.
