Abbreviated reference Précis Analytique Trav. Soc. Acad. Sci. Nancy 1811/12: 26-32. ^{Sept.} 1813.

Notes Report by Haldat that Mougéot and Nestler had conceived the plan of presenting species of cryptogams of the Vosges and Rhine. They planned to issue in fascs. the plants themselves, not illustrations or descriptions. 3 fascs. had already appeared (100 plants). 33 species were not mentioned in the Flore française, by Candolle, 145 were not in the Flore de Lorraine. pp. 28-32 list the new species.
