Author(s) HALLER, Albert.

Haller, Albrecht von

Title Supplément. À l'Agrostographie de Scheuchzer.

MLP 3163

Abbreviated reference Collect. Acad., Pt. Étrangère 13: 521-531. 1779.

Notes Transl. of article in: Mélanges Philos. Math. Soc. Roy. Turin, T. 4, années 1766-1769. P. 57-

Haller had discovered 30 new species of Gramina in a portfolio which had belonged to Scheuchzer, which neither S. nor Linnaeus had described. They are described here.

Plants were:

- 1) Andropogon spica simplicis; 2) Lolium locutis sex floris; 3) Festuca paniculâ spicatâ; 4) Poa glabra, paniculâ pauciflorâ, etc. 5) Poa paniculâ patulâ ~~verticillatâ~~ verticillatâ; 6) Poa panicula stricta, folio calycino altero setaceo; 7) Poa foliis junceis, locustis quinquefloris, etc. 8) Poa foliis junceis, panicula stricta, locustis quadrifloris, etc. 9) Poa panicula stricta, foliis glaucis sulcatis, locustis quadrifloris, etc. 10) Poa minima, panicula patula, locustis quadrifloris, etc.

glaberrimus.

- 11) Poa latifolia, panicula stricta, locustis trifloris calyce longioribus glaberrimus.
- 12) Poa locustis bifloris, calyce brevissima, glumis ovatis obtuse acuminatis.
- 13) Poa diantha, calycis glumis ovatis, floribus villosis.
- 14) Poa monantha, calyce ovato cavo inaequali, flore minori ^{sulcata}
- 15) Poa uniflora, calycis glumis ovato-lanceolatis subdividis ^{semine nitente}
- 16) Poa monantha, panicula densa spicata, foliis patulis.
- 17) Avena foliis radicalibus gracillimis, caulinis latioribus ...
- 18) Avena foliis hirsutis, panicula stricta, locustis trifloris,...
- 19) " diantha, petiolis papposis, gluma florali subhirsuta ...
- 20) " diantha, gluma florali exteriori apice lacerata, petiolis papposis.
- 21) " diantha, calyce flore majori, gluma florali villosa
- 22) " locustis bifloris, flosculis strictis brevissime incis.
- 23) Bromus hirsutis, locustis sexfloris spicatis.
- 24) " spicatus, locustis bifloris, calycis mucronibus praelongis, florum aristis brevissimis
- 25) " locustis bifloris, aristata flore breviori,
- 26) " locustis in spica paucissimis trifloris calyci aequalibus, glumis subciliatis ^{bre}
brevissime aristatis.
- 27) Arundo locustis biflorus muticis, pappo ad basim brevissimo.
- 28) Arundo monantha, altero flosculo abortivo.
- 29) Arundo monantha, flore hirsuto, aristata longissima.
- 30) Phalaris calyce divaricato plano ovato ciliato, gluma florali interiori bidentata.
