Title Monstruosité végétale observée par M. Jacomet.

Abbreviated reference ~~Arch. Découv. Invent. Nouv. [26] ... pendant l'année 1834: 55-56. 1836.~~

Arch. Découv. Invent. Nouv. 1834: 55-56. 1836

MLP 226 A

Notes Irregularity in broccoli (brassica oleracea, botrytis, Linn.)

Instead of developing spherically the broccoli developed in a fan shape - 2cm thick and 30 cm in diameter. Hard, pale green, covered on both sides with the beginnings of sessile leaves, the same number with the same symmetrical arrangement they would have had if the plant had followed normal development; further botanical description.
