B

Author(s) ^P [JOHNSTON, George].

Title [Notice of two plants new to the British flora].

Abbreviated reference Trans. Plinian Soc. 1828/29: 4. 1829.

MLP 1386

Notes Read at meeting of 9 Dec. 1828 by Andrew Baird for Johnston.
New plants were a) A minute species of Melampyram found on S.E. side of the
Cheviots. b) Veronica filiformis said to have been found by Borrer in Sussex.
Some doubts as to whether these could be considered as additions. A committee
had been set up to consider the matter. Abstract.
