

Author(s) ^p Julin, Johan

Title Utdrag af bref til Hr. Prof. Bergius från Hr. Joh. Julin, ...

Abbreviated reference ^{MLP 3342A} Läkaren⁸ Naturf. 8: 378-381. 1787^X

Notes Johan Julin, Apothecary in Uleåborg, Finland. Date of letter, 19 July 1786. Mention made of some plants, Sonchus sibiricus and Saxifraga hirculus, which are sent along with the letter. Letter also states that floras of the Indies and Africa are known better than that of Finland, the only record of which is found in a small list of the medicinal plants to be found around Åbo. Footnote (by ed.?) further identifies this list as being by Helenius (sp.?) and Levin Förteckning på finska medicinal-växter. Åbo, 1773.
