

BIBLIOGRAPHIA HUNTLIANA / Form B — Botanical articles

B

Author(s) G.T. ^PT., G.

Title Suite des faits nouveaux observés au Muséum ~~national~~ d'Histoire Naturelle.
Floraison de plantes nouvelles.

Abbreviated reference Décade Philos. 1799/1800. I(4): 197-200. 1799/1800 [1 Nov. 1799]
MLP 482

Notes Flowering of new plants:

Mimosa alba, new species, from Antilles.

Bignonia stans, Santa Domingo. Established for some time at Museum, up till then few flowers. That year profuse flowering.

Cyrtise, new species, brought back by Bruce from Abyssinia.

Aletris, new species, relative of A. uvaria, Bruce, Abyssinia.

Geranium, new species from C. of Good Hope. Came between G. Myrrifolium & G. Coriandri-
folium.

Dalea purpurea, new sp. sent from S. Carolina by André Michaud Michaux?

Sauge (sage) new sp. same country of origin.

Salvia circinnata of Cavanilles; sent by C. to Museum. Flowering for first time.

Globularia longifolia, described in Hortus Kewensis. Sent to France from the
Canaries by Colignon, one of the naturalists on La Peyrouse's unfortunate voyage.

Over ->

Philanthus grandifolia, a genus of the Euphorbia family, brought back from Antilles by Baudin.
Cactus grandiflora from S. America.
