

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) Taylor,

Title Von der Bereitung der Orseille [from a valuable English manuscript by Mr. Taylor, of Manchester].

MLP 2609
Abbreviated reference Neufortgesetzte ^{Samml.} Ökon. Bienen-Schriften 1801 (2): 29-37.
 1801.

Notes Abstract ~~by author~~ of the translation into German by Dr. Ludwig. The dye, orseille, is made of four different mosses or ferns, imported from the Canary Islands, Barbary, Costa Verde, and Wales. (Bock moss). This translation is followed by a summary, by ed. Riem [?], of information on dying derived from the German translation by (Daniel) Jaeger of Edward Bancroft's Experimental researches concerning the philosophy of permanent colours (Englisches Färbetuch von Bancroft)., pp. 37-38.
