

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) THIÉBAUT DE BERNEAUD, [Arse].
p Thiébaud de Berneaud, Arsène

Title Observations sur la prétendue découverte faite par M. Gimbernat, d'une substance qu'il appelle zoogène.

Abbreviated reference ~~Rev. Encycl. 11, troisième année, (33), 670-672, septembre 1821~~
 Rev. Encycl. 11(33): 670-672. 1821 [Sept.] September.

MLP 1257 A

Notes Extracts from a letter to the Rev. Encycl. from the Société ^{linéenne} de Paris, the article signed by Thiébaud de Berneaud.
 Numerous articles had been written in journals about the substance found by the Spanish naturalist, in the thermal waters of Baden, and which he called zoogène. The substance had, in fact, been known for 75 years and had been discovered in water at Carlsbad by Springfield. Scherer subsequently named it conferva thermalis. It was known by modern botanists as tremella reticula.

A footnote gives the titles of works on tremella reticula, by Springfield, Schrank Scherer and Strange.
