

B

BIBLIOGRAPHIA HUNTIANA / Form B — Botanical articles

Author(s) ^P THOMPSON, Joseph (Gardener to His Grace the Duke of Portland, at Welbeck in Nottinghamshire).

Title A review of fifty kinds of grapes described by Mr. Speechly in his "Treatise on the vine", with such corrections as subsequent experience shews the necessity of.

Abbreviated reference Trans. Hort. Soc. London 7 (2): 263-274. 1830 [<26 Apr. 1828>]

MLP 1370

Notes Read Feb. 5, 1828

This is not a review of Speechly's 'Treatise', but a reappraisal of the 50 or so varieties of vine that Speechly described in his work, which was published in 1789 and subsequently in different editions.

e.g. No. 24 Smyrna grape. This kind was only cultivated in a pot, and was put out of the collection soon after 1790

No. 25 Brick grape. Was discarded long before 1800. It never had a place in the Welbeck collection except in a pot. etc.

An E form would have been appropriate at the time when Vegter was using the 1st ed. MBL, since the work is not listed in ~~there~~. However no details of publication or anything else are given about it in the article, and since it is particularly well documented in 2nd ed. MBL, I would not have sent in an E form, as it would

from Thompson's
article

{ add nothing to its information. A D-form is not required. }
