Notes Communicated at the meeting of Oct. 5, 1840, held at Wakefield.

\*N.B. the word geology in the first part of the sentence is a printing error.

The contents list gives the title as: "The agriculture of the West-Riding, etc."  
In the article itself the word has been crossed out and agriculture written in by hand.

The article itself deals with the interrelation of geology & agriculture & a considerable amount of plant physiological and chemical botany is therefore included.
