Author(s) VILMORIN, [Pierre Louis Fr.] *Vilmorin, Pierre Louis François*
Lévêque

Title De l'avoine d'hiver.

Abbreviated reference *MLP 3942* Cultivateur (Paris) 1 ~~(13)~~: 119-123. 1829 [Sept.]

Notes P. 120 gives the plant's characteristics. The rest of the article deals with its advantages. Widely cultivated in Brittany.
The article ends with a post script: Vilmorin says, that, up to that time, he had known of only one variety of winter oats, that just described. However, information incomplete though it was, had led him to believe that another variety with a black or dark brown ear existed.
