B

Author(s) Virey, [Julien-Joseph]

Title De l'origine des diverses espèces d'Ipécacuanha.

MLP 3306

Abbreviated reference J. Soc. Pharm. (Paris) 1.[I](9): 74. 1799/1800 [6 Oct.].
1797

Notes The more common (brown) ipecacuanha is derived from Psychotria emetica, which is briefly described here. The light (white) form, seldom used in France, comes from Asclepias curassavica Linn. In Virginia Spirea trifoliata L. is used for the same purpose. In Guinea use is made of Boerhavia hirsuta while Periploca indica is used in Ceylon.
